

TIRA BEAUTY TESTPLANS MODULE WISE:

Test Plan on Login Module:

Test plan identifier = tp_login_2025_v1

Introduction = validate user authentication (if valid credentials – login successful, else invalid credentials – display error messages for invalid username, password, or empty fields)

Test items == username field, password field, sign in button, error message display, input validation (special chars/numeric-only checks)

Features to be tested === valid login, invalid login, empty username, empty password, numeric-only username, special character username, password validation (alphanumeric, numeric-only)

Features not to be tested == forgot password link, keep me signed in checkbox, UI theming, backend DB validation

Approach = manual testing (black box testing – functional testing, negative testing for invalid inputs)

Item pass/fail criteria = login success redirects to homepage, login failure displays error, field validation errors appear correctly

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Test Link, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = No risks identified

Approvals = Vaishali Sonanis

Test Plan on What's New Module:

Test plan identifier = tp_whatsnew_2025_v1

Introduction = validate What's New page functionality (if products are new – display correctly with badge, if filter/search applied – results must match, else show error messages or failed loads)

Test items == product listing, category filter, search box, new arrival badge, pagination, product images

Features to be tested === product list loading, filter by category, search box, badge display for new arrivals, pagination, image loading

Features not to be tested == backend database sync, pricing logic, recommendation engine

Approach = manual testing (black box testing – functional + UI testing, negative testing for broken images)

Item pass/fail criteria = page loads all products, filters return correct subset, search returns relevant items, images must load, pagination navigates properly

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers'

names)

Schedule = 17/08/2025

Risks and contingencies = Image loading issues, dependency on backend product sync

Approvals = Vaishali Sonanis

Test Plan on Skin Module:

Test plan identifier = tp_skin_2025_v1

Introduction = validate Skin category page functionality (if products load correctly – display with name, price, add-to-cart button, else show missing image/content error)

Test items == product listing, filters (brand, price, skin type), search box, add-to-cart button, product images, pagination

Features to be tested === product display, filters, search, add-to-cart button, image loading, pagination

Features not to be tested == backend pricing logic, recommendation engine, stock availability updates

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = products must load correctly, filters refine results, search shows relevant results, add-to-cart works, images display properly

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers’

names)

Schedule = 17/08/2025

Risks and contingencies = No risks identified

Approvals = Vaishali Sonanis

Test Plan on Makeup Module:

Test plan identifier = tp_makeup_2025_v1

Introduction = validate Makeup category page functionality (if filters and products work properly – user can view and add products, else errors in broken links or missing content)

Test items == makeup categories (face, eyes, lips), filter options, search box, add-to-cart button, product detail navigation, pagination

Features to be tested === category navigation, filters, search, add-to-cart, pagination, product details page redirection

Features not to be tested == backend order processing, pricing logic, recommendations

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = correct category items displayed, filters refine results, search shows valid products, navigation works, pagination functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers’

names)

Schedule = 17/08/2025

Risks and contingencies = Broken category links, UI alignment issues

Approvals = Vaishali Sonanis

Test Plan on Hair Module:

Test plan identifier = tp_hair_2025_v1

Introduction = validate Hair category page functionality (if product categories and filters display correctly – smooth navigation and cart addition, else errors in missing product info or images)

Test items == shampoo, conditioner, oils, serums category, product filters, search box, add-to-cart, pagination

Features to be tested === product listings, category filters, search, pagination, add-to-cart

Features not to be tested == backend stock updates, recommendation engine, loyalty programs

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = products must load, filters refine results, search relevant, add-to-cart functional, pagination works

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers’

names)

Schedule = 17/08/2025

Risks and contingencies = Image loading issues, product info mismatch

Approvals = Vaishali Sonanis

Test Plan on Fragrance Module:

Test plan identifier = tp_fragrance_2025_v1

Introduction = validate Fragrance category page functionality (if perfumes and deodorants load correctly – display with price and description, else missing images, broken links, or content issues)

Test items == perfumes, deodorants, product filters, search box, add-to-cart, product detail redirection

Features to be tested === product listing, filters, search, add-to-cart, product details, pagination

Features not to be tested == backend recommendation system, stock updates, loyalty discounts

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = category must display all fragrance products, filters refine, search works, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers’

names)

Schedule = 17/08/2025

Risks and contingencies = UI misalignment, product duplication issues

Approvals = Vaishali Sonanis

Test Plan on Body & Bath Module:

Test plan identifier = tp_body_bath_2025_v1

Introduction = validate Body & Bath category functionality (if soaps, shower gels, body lotions display correctly – user can browse and add products, else show broken images or navigation errors)

Test items == soaps, shower gels, body lotions, scrubs, search box, product filters, add-to-cart

Features to be tested === product listings, filter functionality, search, add-to-cart, pagination

Features not to be tested == backend stock sync, order delivery flow, payment integration

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = all body & bath products load, filters refine results, search gives valid results, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers’

names)

Schedule = 17/08/2025

Risks and contingencies = Incorrect product categorization, missing add-to-cart

Approvals = Vaishali Sonanis

Test Plan on Minis Module:

Test plan identifier = tp_minis_2025_v1

Introduction = validate Minis category functionality (if mini versions of products display correctly – price, quantity visible, else missing info or broken links)

Test items == mini perfumes, mini skincare, trial packs, add-to-cart, search, pagination

Features to be tested === product listing, search, filters, add-to-cart, pagination

Features not to be tested == backend stock updates, recommendation engine, cart payment

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = all minis display correctly, filters refine results, add-to-cart works

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = Price mismatch issues, missing product thumbnails

Approvals = Vaishali Sonanis

Test Plan on Mom & Baby Module:

Test plan identifier = tp_mom_baby_2025_v1

Introduction = validate Mom & Baby category functionality (if baby care and maternity products load correctly – safe navigation and product info visible, else show broken content or errors)

Test items == baby shampoo, baby lotion, diapers, mom care kits, filters, add-to-cart, search box, pagination

Features to be tested === product listing, filters, search, add-to-cart, product details page

Features not to be tested == backend order flow, stock synchronization, loyalty system

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = products load with correct details, filters refine properly, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = Content mismatch, broken links in baby care products

Approvals = Vaishali Sonanis

Test Plan on Tools & Appliances Module:

Test plan identifier = tp_tools_appliances_2025_v1

Introduction = validate Tools & Appliances category functionality (if grooming kits, hair styling tools, appliances display correctly – user can navigate and add-to-cart, else broken links, missing images, or layout issues)

Test items == grooming kits, trimmers, hair dryers, straighteners, search box, product filters, add-to-cart, pagination

Features to be tested === product listing, filters, search, add-to-cart, product details page, pagination

Features not to be tested == backend inventory management, payment gateway, delivery workflow

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = all tools & appliances load correctly, search and filters work, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = Tool compatibility issues, wrong product redirection

Approvals = Vaishali Sonanis

Test Plan on Wellness Module:

Test plan identifier = tp_wellness_2025_v1

Introduction = validate Wellness category functionality (if health & wellness products display correctly – supplements, oils, personal care visible, else broken pages or product duplication)

Test items == supplements, essential oils, hygiene products, filters, add-to-cart, search box, pagination

Features to be tested === product listing, search, filters, product detail, add-to-cart, pagination

Features not to be tested == backend stock updates, order tracking, payment gateway

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = all wellness products display with correct info, filters and search refine properly, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = Incorrect product categorization, missing images

Approvals = Vaishali Sonanis

Test Plan on Men's Module:

Test plan identifier = tp_men_2025_v1

Introduction = validate Men's category functionality (if grooming, skincare, haircare products for men display correctly – price and details visible, else navigation errors or missing content)

Test items == men's grooming, skincare, beard oils, shampoos, add-to-cart, filters, search box, pagination

Features to be tested === product listing, search, filters, product details, add-to-cart, pagination

Features not to be tested == backend payment integration, loyalty system, delivery workflow

Approach = manual testing (black box testing – functional and UI testing)

Item pass/fail criteria = men's products display correctly, filters refine results, add-to-cart functional

Suspension criteria and resumption requirements = 17/08/2025 suspension

Test deliverables =

- Test Plan
- Test Cases Document
- Test Reports
- Bug Reports
- Test Summary Report
- Test Analysis Report
- Review Documents
- Bug Analysis Report

Environmental needs = Windows 11 PC, Excel, Chrome, Firefox, internet

Responsibilities = Kothapalli Sumalatha (prepare test cases and test analysis reports)

Staffing and training needs = Selenium WebDriver, TestNG framework (testers' names)

Schedule = 17/08/2025

Risks and contingencies = UI alignment issues, incorrect search results

Approvals = Vaishali Sonanis
